## PROFESSIONAL SKILLS

- |                      |       |
|----------------------|-------|
| - Django             | ===== |
| - Python             | ===== |
| - React              | ===== |
| - DevOps             | ===== |
| - HTML / CSS         | ===== |
| - Javascript         | ===== |
| - Git CI/CD          | ===== |
| - Docker             | ===== |
| - Celery & Redis     | ===== |
| - PostgreSQL / MySQL | ===== |

## PERSONAL SKILLS

- Motivated
- Multi-tasking
- Decision Making
- Entrepreneur Spirited
- Problem Solver
- Team Player

## LANGUAGES

- English ( Upper Intermediate )
- German ( Beginner )

## THINGS I WANT TO LEARN & MAKE IN A YEAR FROM NOW

- Able to have proficiency about web development concepts which I haven't been familiar with yet.
- To make an autonomus system project that will provide people to work on more human needed jobs as my system will be able to do that for them.
- Learning full stack development for mobile applications.
- Travel at least 1 foreign city.

## HERE'S MY STORY:

I am a Software Developer and looking for an experience that improve myself in back end development and could enjoy it.

## VOLUNTEERING & ASSOCIATIONS

### Head of IT

YTU SPACE AND ART KITCHEN  
JUNE 2019 - FEBRUARY 2020

- Designing, updating and optimizing society's web properties.
- Directing the event stages as Stage Director.

### Member of the Advisory Board

YTU SPACE AND ART KITCHEN  
FEBRUARY 2020 - 2021

### Member of Yildiz Rover Team

YTU SPACE AND ART KITCHEN  
SEPTEMBER 2019 - 2020

- Designing object detecting and tracking algorithms.
- Programming microcontroller for driving control.
- Designing / drawing and implementing the electrical circuit.

Technologies: Python, OpenCV, TensorFlow, Numpy, C/C++  
Tools: PyCharm, Ubuntu 16.0.4 OS, Raspberry Pi, Nvidia Jetson Nano, High Resolution Cameras

## PROJECTS

- letsacademy.co ( Python/Django LMS Project still going on )
- tedxyildiztechnicaluniversity.com ( YTU's official TEDx website )
- ytuspark.com ( Wordpress project for school club )
- soforariyorum.herokuapp.com ( Django/React Project as startup )
- 4startups.club ( Wordpress project for an entrepreneurship blog )
- yildizcep.com ( Django Project for a school app introduction )
- gamesup.com.tr ( Wordpress project for YTU Technopark )
- entaksi.com.tr ( PHP / Laravel project for Entaksi )
- mobilbil.com.tr ( Wordpress project )

## HOBBIES

- Following new trend technologies from blogs and social media
- Swimming
- Chess
- Formula 1
- E-sports

## EDUCATIONAL INFO

### Control and Automation Engineering

YILDIZ TECHNICAL UNIVERSITY  
- Graduated at February 2023

## COURSES & CERTIFICATES

- OpenCV Image Processing With Applications - Udemy Oğuzhan Gürbüz
- Electric and Electronics Education Certification of Attendance - Özel İstanbul Bilgisayar Eğitim Merkezi Kursu
- Python Django Practical Guide (Maximilian Schwarzmüller)
- Patika.dev Full Stack Developer Patikas

## EXPERIENCES

### **Back End (Python) Developer at Akinon October 2023 - Present**

- Python/Django code-based production, extensive testing, and e-commerce development.
- Developing extensions, integration flows and making tests of them in an omnichannel back-end structure.
- Optimizing application for maximum speed and scalability.
- Third party integrations and analysis of processes.
- Collaborating with front-end developers, designers, and product managers to deliver robust features.

Technologies: Python, DRF, PostgreSQL, Redis, Celery, Elasticsearch

Tools: PyCharm, AWS, PgAdmin, VsCode, Docker, Postman, Git, Bitbucket, Sentry, Jira, Slack

### **Software Developer at Cloudyflex December 2022 - October 2023**

- Coding custom enhancements based on customers' needs.
- Designing automation workflows in Zoho.
- Developing web based custom actions (Client Script) via Javascript.
- Preparing API collections, mappings and test cases.
- Making external integrations with 3rd party organizations or applications.
- Preparing API documentations and tutorials twchich may help colleagues
- Developing custom extensions on Zoho Desk & CRM

Technologies: Python, Deluge, Javascript, SQL, REST & SOAP services

Tools: Postman, PyCharm, VsCode, Zoho CRM, Zoho Desk

### **Full Stack Developer at University4Society March 2021 - May 2022**

- Designing, updating and optimizing letsacademy.co which is a learning management system.
- Technical consultancy for insider startups.
- Web-site design and management for clients.

Technologies: Python, DRF, Javascript, PostgreSQL, REST API, HTML CSS, React

Tools: PyCharm, Postman, Docker, Jenkins, Git, PgAdmin, Sentry

### **R&D Intern at Mobilbil Endüstri Teknolojileri Ltd. Şti. August 2020 - March 2021**

- Designing, updating and optimizing mobilbil.com.tr.
- Designing, updating and optimizing entaksi.com.tr.
- Assisting senior developers on creating and updating Entaksi mobile application and its related backend services.
- Assisting senior engineers in research and development proccesses on IOT technologies that used in solutions.

Technologies: Python, Swift, Numpy, Matplotlib, MySQL, Laravel

Tools: PyCharm, PuTTY, Postman, VsCode, GPS, Taximeter Hardwares

### **Banapos (Contactless Payment System) November 2022 - 2023**

- Working on and analyzing product setup.
- Designing backend structure and all DevOps.
- Development, testing and optimizing of Rest APIs.
- Assisting the frontend processes

Technologies: Python, DRF, PostgreSQL, Javascript, REST API, React (for dashboards), JWT, Redis, Celery

Tools: PyCharm, AWS, PgAdmin, VsCode, Docker, Postman, Heroku, Git, Github, Sentry
